ACC-HS1 Information

ACC-HS1 Sealed outdoor weatherproof security camera housing + mount arm bracket adapter system.

Profile:

This turns ANY of our indoor/ non-weatherproof cameras into an outdoor rated unit (in conditions which don't get too hot or cold). These 'big boys' are a great visual deterrent, even if empty or faced with a lens only- though, in this day and age, we have high quality cameras available for little more than the price of the mounts!

Security hasp on rear is pad-lockable. O-ring sealed housing. We include the heavy-duty wall mount arm bracket + hardware.

Common Applications:

- External or higher security internal mounting of CCTV cameras
- Visual deterrence in higher risk environments

Available Options:

FREE heavy duty arm bracket included with each housing ordered.

Variations / Alternate Equipment to Consider:

We have an even smaller housing + mount version available (#ACC-HSS).

We have same housing outfitted with an internal thermostatically controlled heater/ blower fan (#ACC-HS2) which requires 24v AC power.

ACC-HS1 Technical Specifications
