ANT-9008 Information

The ANT-9008 flat panel antenna is a great choice for optimizing the range potential of 900 MHz wireless audio/video link systems. This antenna has a high 8 dBi gain, giving it the ability to potentially increase range up to approximately 3x with a wireless transmitter and receiver system. The ANT-9008 can be set up on the transmitter side, receiver side, or both for the absolute best signal performance.

However, as a directional antenna the ANT-9008 is not typically recommended for short range wireless broadcasts. This antenna is meant to be pointed DIRECTLY at the antenna on the opposite side of your wireless transmission, preferably with a pure line of sight between the two antennas.

The antenna has an N plug for its RF (radio frequency) output providing simple plug and play use with many Eyespyvideo.com 2.4 GHz wireless equipment using an N to SMA cable.

The ANT-9008 is weatherproof and can be mounted outdoors or indoors with its included pole-mounting hardware. Due to its large size (8.5" square), the ANT-9008 flat panel antenna may not be suitable for many miniature video applications but works very well for long range stationary wireless video.

Use this antenna with the THX-9100, THX-9500, TX-9100, and TX-9500 transmitters. It can also be implemented in combination with the RX-910 or MRX-900 receivers.

ANT-9008 Technical Specifications

RF Frequency Range	900 MHz
Antenna Gain (dB)	8 dBi
Antenna Type	flat panel
Cable Length	12" / 30.5 cm lead to N plug
RF Output Plug	female N plug
Weatherproof Construction?	yes
Dimensions	8.5" x 8.5" x 1.8" / 215mm x 215mm x 45mm
Weight	13.8oz. / 392.6g
Warranty	one year
*Additional Features	white color, easy installation to wall mounting applications, compatible with ANT-BRKT pole-mounting bracket (\$14.95)
